

Observation	Short-term monitoring/Tx (24-48 hrs) Not formally admitted (impacts insurance)
Acute	Nurse-to-patient ratio 1:4-6 Intermittent vitals; +/- telemetry Standard IV medications
Progressive	Nurse-to-patient ratio 1:3 Continuous vitals (telemetry) Selective continuous IV medications

Bolus (VA)	High patient volume w/ various complexities, short amount of admitting time
Drip (GSH)	Low-medium patient volume w/ various complexities, more admitting time

	Sick	Not Sick
Differentiated	#2 to see If clear plan, less UL/rounding time Time: min pre-round, mod pt eval - Intern level	#4 to see Quick, low time to admit Time: min pre-round & pt eval - Medical Student level
Not Differentiated	#1 to see Significant UL time, Significant rounding time Time: min pre-round, mod-high pt eval - UL w/ Intern	#3 to see Depending on other time constraints, more/less pondering time Time: min-mod pre-round & min pt eval - Intern/Medical Student level
